

9.1P: In Person Check-in 3 – Answer Sheet

1. **What was the most challenging aspect of the case study tasks? Why?**

The most challenging aspect of the case study tasks is to be able to understand what is needed to be done. This is because if the task was wrongly understood, the result of the project will be incorrect or not what I was expecting.

2. **What is the most valuable thing you have learned in this unit so far?**

I have learnt that the most valuable thing in this unit was to have a solid foundation in the program language that will be used for the project. The more I practice, the more fluent I will be in solving coding problems.

3. **What are some strategies for success you can start or continue using for the remainder of the semester and in future units?**

There are a few strategies that can continue applying for the upcoming semesters. For example, I can keep practicing and reviewing the knowledge that was being taught in class. Additionally, I can discover a few more ways to make problem solving easier such as deconstructing each part of the task and understand them one by one.
