COS20007 OBJECT ORIENTED PROGRAMMING

Object Oriented Hello World

PDF generated at 18:13 on Thursday 9th November, 2023

```
1  using System;
2
3  namespace HelloWorld
4  {
5      internal class Program
6      {
7          static void Main(string[] args)
8          {
9              /*Message myMessage = new Message("Hello World - from Message Object");
10              myMessage.Print();*/
11
12              Message myMessage;
13              Message[] messages = new Message[5];
14              string name;
15
16              myMessage = new Message("Hello World");
17              myMessage.Print();
18
19              messages[0] = new Message("Salute!");
20              messages[1] = new Message("Oh hey, g'day mate.");
21              messages[2] = new Message("Are you free for dinner at 6:00PM?");
22              messages[3] = new Message("Cheers mate!");
23              messages[4] = new Message("Good morning.");
24
25              Console.WriteLine("Enter your name: ");
26              name = Console.ReadLine();
27
28              if (name == "Bill")
29              {
30                  messages[0].Print();
31              }
32              else if (name == "Jeffery")
33              {
34                  messages[1].Print();
35              }
36              else if (name == "Alice")
37              {
38                  messages[2].Print();
39              }
40              else if (name == "Joshua")
41              {
42                  messages[3].Print();
43              }
44              else
45              {
46                  messages[4].Print();
47              }
48          }
49      }
50  }
```

```
1  using System;
2  using System.Collections.Generic;
3  using System.Linq;
4  using System.Text;
5  using System.Threading.Tasks;
6
7  namespace HelloWorld
8  {
9      internal class Message
10     {
11         private string _text;
12
13         public Message(string text)
14         {
15             _text = text;
16         }
17
18         public void Print()
19         {
20             Console.WriteLine(_text);
21         }
22     }
23 }
```

The screenshot shows a Visual Studio Debug Console window with a black background and white text. The text displays the output of a C# program: 'Hello World', a prompt 'Enter your name:', the user input 'Bill', and the final output 'Salute!'. The window title bar at the top reads 'Microsoft Visual Studio Debug Console' with standard window controls. The bottom of the image shows the beginning of a file path: 'C:\Users\anlon\source\repos\Sw'.

```
Microsoft Visual Studio Debug Console
Hello World
Enter your name:
Bill
Salute!
C:\Users\anlon\source\repos\Sw
```
